among members of the legal profession and judiciary throughout the world there is a genuine concern with establishing and maintaining high ethical standards it is not difficult to understand why this should be so nor is it difficult to see the professional standards are not completely divorced from ordinary morality indeed legal ethics and professional responsibility are more than a set of rules of good conduct they are also a commitment to honesty integrity and service in the practice of law in order to ensure that the standards established are the right ones it is necessary first of all to examine important philosophical and policy issues such as the need to reconsider the boundaries between on the one hand a lawyer's obligation to a client and on the other the public interest it is also to be appreciated that conflicts of interest are pervasive and that all too often they are so common that they are not recognized as such yet rarely is public policy clearly cut the underlying themes of this book are that the move to more definite rules is not only inevitable but also desirable that existing codes of professional practice cannot simply be treated as a system of specific rules that the current set of ethical rules is contestable and requires further refinement perhaps even radical surgery and that legal ethics must be conceived in the more general area of professional responsibility the wider ethical issues of the operation of the legal profession as a whole are now firmly on the agenda both law schools and law professionals have a role to play in developing acceptable standards in this area and it is therefore appropriate that the essays in this volume are written by a distinguished group of law teachers and practitioners together with senior members of the judiciary the book opens with an overview chapter followed by three chapters analysing the ethical rules pertaining to the judiciary the bar and solicitors written by respectively the master of the rolls anthony thornton and alison crawley and christopher bramall the following three chapters look at the specific issues of confidentiality michael brindle and guy dehn and the particular ethical problems in the family and criminal law jurisdictions sir alan ward and professor andrew ashworth respectively chapter 8 by sir alan paterson discusses the teaching of legal ethics whilst chapters 9 and 10 by marc galanter thomas palay and cyril glasser put the subject in its wider social and professional context the book finishes with a chapter which examines what lawyers may learn from looking at the study of medical ethics

George William Warvelle 1852-1940 was a legal paragon in his time, a professor of law in Chicago, a prominent legal scholar, and the author of many law volumes still in print and found in law offices and libraries today. This book was first published in 1902 in an era of no radio, no TV, or other electronic wastelands, an era when man communicated with conversation, reading, and writing. The book is by a lawyer and was aimed at the then law students and practicing lawyers; however, the lessons therein are of historical interest to any lawyer or scholarly person today.

emphasizes the relevance of legal environment topics to business functions, e.g., marketing, finance, human resources, accounting, manufacturing. Excerpted cases include substantial portions of original language of the court and competing arguments. The text presents a strong emphasis on ethics, international law, environmental law, and women's legal concerns.

The study of legal ethics and the legal profession has emerged as a distinct and important field of scholarship. Over the years, this book offers contemporary and non-mainstream perspectives on the shape of the legal profession, it examines how the public sees lawyers and how lawyers see their own profession.
